Institute of Thermodynamics and Sustainable Propulsion Systems (ITNA)

Large Engines Competence Center (LEC)

Conference Directors:
Univ.-Prof.Dr. Helmut EICHLSEDER
Ao. Univ.-Prof.Dr. Andreas WIMMER

Save the Date: September 4-5, 2025

SMTP25 – 20th Symposium on Sustainable Mobility, Transport and Power Generation*

The symposium on “Sustainable Mobility, Transport and Power Generation” will take place for the twentieth time in 2025 and will therefore be celebrating an anniversary (SMTP25).

Traditionally, the symposium is jointly organized by ITnA (Graz University of Technology) and the LEC (Large Engines Competence Center).

The focus will be on the following key areas:

- Innovative combustion concepts for future fuels (hydrogen, ammonia, methanol and other e-fuels) and applications to all types of engines, from small engines to passenger car and heavy duty engines to large engines
- Electrification of propulsion systems
- Fuel cell technology for mobile and stationary applications
- Decarbonization of power generation and transport as well as the production of PtX fuels
- New simulation tools and applied measurement technologies

Overall, a comprehensive program awaits you with pioneers and visionaries of the global ecosystem in the areas of mobility, transport and power generation. We would be very pleased to welcome you at the symposium!

Venue: CONGRESS GRAZ

Sparkassenplatz 1, A-8010 Graz
